

Building Wealth in Minutes a Day

Swing-13 is the latest addition to our family of mechanical short term trading strategies. Using OmniTrader 2013's new [DSS Feature](#), Swing-13 only takes the best trades, resulting in consistent gains with low drawdowns.

The Power of Swing-13 and DSS

Swing-13 looks for pullbacks away from the direction of the primary trend. When this occurs, a signal is generated which is looking for short term gains. While its overall performance is good, this strategy is capable of firing a lot of trading signals during certain market conditions.

In this type of situation, DSS really shines. By limiting the number of Swing-13 trades allowed based off of market conditions, DSS keeps the strategy from getting over allocated. As market conditions change, DSS monitors and adjusts the mix of long and short trades. With DSS managing the trades, ensuring only the best signals get through, the Swing-13 Strategy generated a 24% return in 2012 with a low maximum drawdown of only 4%!*

Swing-13 with DSS Results on the S&P 500 Stocks

A Swing Trader's Dream

The charts below show exactly why swing traders love Swing-13's Trading Signals. Swing-13 pinpoints overbought and oversold conditions in the market, and then takes advantage of the sharp movement that occurs as the market normalizes.

The trades are quick and easy to manage. Most trades last less than a week, as the market generally snaps back into line immediately after the signal is fired. This ensures your capital is only risked when there is an extremely high probability of gains. DSS takes this approach even further by:

- ✓ Ensuring you are only trading the best signals
- ✓ Only taking trades that are consistent with the current state of the market.

This approach has produced outstanding returns over the past year, and Swing-13 with DSS is poised to continue this performance in the New Year. Take a look at some of the recent trades generated by Swing-13 with DSS:

Entry Date	Symbol	Position	Entry Price	Exit Date	Exit Price	% Gain
12/4/2012	BBY	Short	\$12.93	12/5/2012	\$12.20	5.6%
